**Magnetic Recording Solutions' New Headquarters
Accommodates Continuing Growth**

SANTA CLARA, CA. - Magnetic Recording Solutions, Inc. (MRS), a leading supplier of disk drive production and test equipment, has moved to a new headquarters facility here after outgrowing the space it had occupied since 1997. The new MRS headquarters is nearly triple the size of its previous facility, also in Santa Clara. The old facility will be retained to provide additional manufacturing capacity for an expanding product line.

"With the introduction of our new MRS3000, the industry's most advanced production test system for disk drive media certification, it became apparent that we needed to expand in order to accommodate the growth of the company," said Vlad Pogrebinsky, founder and CEO of Magnetic Recording Solutions. "Our new facility is optimally equipped to help us respond to the needs of our customers, as well being ideally located so we can continue to attract the best talent in the high-tech industry."

The new MRS headquarters facility is located at 1115 Space Park Drive, Santa Clara, CA 95054. Telephone: 408-970-8266. Fax: 408-970-5189. Internet: www.mrs-usa.com

About Magnetic Recording Solutions

Magnetic Recording Solutions, Inc. is a private corporation founded in 1997. The company supplies equipment to manufacture and test magnetic media used in the disk drive industry. MRS is the technology leader in developing and building media certifiers. The company also makes critical components for the semiconductor chip making and optical fiber industries.
