**Magnetic Recording Solutions Announces Opening of MRS Asia (S) Pte. Ltd., a New Customer Applications Support Center in Singapore**

*MRS Asia will provide customer applications support for the MRS line of advanced test equipment for the Data Storage Industry in Southeast Asia, Japan and Korea.*

SANTA CLARA, CA. - Magnetic Recording Solutions, Inc., a leading supplier of rigid magnetic media test equipment, announced the opening of their Singapore based facility to provide customers with technical applications support, equipment demonstration and training. MRS will continue to partner with Dymek Company Limited to provide local equipment service and spare parts inventory to support to customers throughout the region.

"Southeast Asia offers excellent opportunities for Magnetic Recording Solutions as demand grows for next-generation PMR rigid media and the requisite equipment capable of testing them," stated Vlad Pogrebinsky, president and CEO of Magnetic Recording Solutions.

"Our new 3000-G2 Series of media certifiers, coupled with advanced options for work cell automation, enable a high level of productivity for magnetic media production. In order to help our customers realize the maximum benefit of our testers' capabilities, we needed to have strong applications engineering and systems training available within the region and time zone. The new applications support center will allow MRS to better provide this service to our customers," added Pogrebinsky.

The new support center, located in Singapore's Ang Mo Kio Industrial Park, is dedicated to serving the specific requirements of magnetic disk media and hard drive manufacturers. MRS application engineers will work in close contact with customers to develop specific test capabilities and provide training and support on MRS' advanced media testers. The facility will also provide technical support for field engineers throughout the region.

### **Dymek Company Limited**

Established in 1989, Dymek is a distributor of advanced production equipment used in the data storage, semiconductor and optical industries. Headquartered in Hong Kong, Dymek provides technical support and maintenance services from eight regional offices in China, Malaysia, Philippines, Singapore, Taiwan and Thailand. Their service center in Shenzhen, China is dedicated to serving the specific requirements of hard disk media manufacturers. Dymek also is engaged in OEM sub-contract manufacturing, ceramics-ferrite manufacturing, and precision tooling and fixture fabrication, as well as consumables and accessories trading.

### **About Magnetic Recording Solutions**

Magnetic Recording Solutions, Inc. is a private corporation founded in 1997. The company supplies equipment to test rigid magnetic media used in the hard drive industry. MRS is the technology leader in developing and building media certifiers. MRS also makes production test equipment and modules for the semiconductor wafer inspection and optical component test industries. MRS maintains headquarters at 1115 Space Park Drive, Santa Clara, CA 95054. Visit MRS on the Web at [www.mrs-usa.com](http://www.mrs-usa.com)
